**Examiner's Amendment**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

(1) In the specification, page 1, insert as line 1 "This application is a continuation of copending application Serial No. 09/400,628, filed September 20, 1999, now U.S. Patent No. 6,306,930, which is incorporated here by reference."

(2) Claim 1, line 6, after "viscometer" and before "(R 14 cone)", delete "3" and insert "3<sup>0</sup>".

(3) Claim 8, line 1, after "claim", delete "1" and insert "5".

2. Authorization for this examiner's amendment was given in a telephone interview with Bradley Geist on 11/5/03.

**Statement of Reasons for Allowance**

3. The present claims are allowable over the "closest" prior Yoshioka et al. (U.S. 5,621,021) and Uzukawa et al. (U.S. 5,120,359) for the following reasons:

Yoshioka et al. disclose erasable aqueous ink that contains film-forming resin such as styrene-butadiene and 5-30% colorant having particle diameter in the range of 2-10  $\mu\text{m}$ . It is disclosed that the colorant is a colored resin formed from pigment such as Pigment Black 1, Pigment Green 7, and Pigment Blue 15.

However, Yoshioka et al. disclose that the ink has viscosity of 5-35 mPas which is outside the scope of the present claims which now all require that the ink has viscosity of 500-5000 mPas.

Uzukawa et al. disclose an erasable aqueous ink suitable for use in ballpoint pens wherein the ink has viscosity of 100-300 mPas measured using an ELD viscometer ( $3^0$  cone, 0.5 rpm,  $20^0$  C) and wherein the ink comprises film-forming resin such as styrene-butadiene and 10-70% colorant such as Pigment Black 1, Pigment Green 2, and Pigment Blue 15.

However, there is no disclosure in Uzukawa et al. of particle size distribution of the colorant as presently claimed. Further, Uzukawa et al. disclose the use of inks that have viscosity of approximately 110, 200, and 320 mPas measured using an ELD viscometer at 0.5 rpm, which is outside the scope of the present claims which now all require that the ink has viscosity of 500-5000 mPas.

Thus, it is clear that Yoshioka et al. or Uzukawa et al., either alone or in combination, do not disclose or suggest the present invention.

In light of the above, it is clear that the rejections of record are untenable and so, the present claims are passed to issue.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
